Experience

Jetfuel

Product Designer

Feb 2020 - Present

- Collaborated with the CEO to determine product roadmap and required features to increase user retention and increase profitability
- Worked with the engineering team to create a functional system to organize our design files.
- Built the basis for our design system that includes flexible component elements
- Lead design for the features in our open network initiative which includes introducing profiles, messaging and connections on the Plug
- Lead design for the features for direct buys, an initiative aimed at increasing revenue

Square | Cash App

Product Design Intern

Jun 2019 - Aug 2019

- Collaborated with designers, engineers and PMs within the Ecosystems and Boost workstreams, where I scoped, ideated and designed features.
- Participated in design critiques, where I provided and received feedback on designs within a variety of features and workstreams.

The SMBX

Product Design Intern

July 2018 - Oct 2018

- Collaborated with head designer to identify main user painpoints within the user flow of the mobile app, and worked to ideate solutions.
- Redesigned the confirmation pages for successful bids, buys, and sells of bonds focusing on creating a user experience focused on earning users trust.

UCB Student Affairs

Graphic Design Assistant

- Designed graphic components to increase awareness of various Facebook and Twitter campaigns for the Public Service Center.
- Designed infographics following the UC Berkeley style guide to increase awareness of the impact the Public Service Center has had on the campus.
